

It's All About Time Control Cost

WheelRenew® can help your dealership tackle the frustration of time, control and cost when it comes to tire and wheel and Wheel repairs overall.

Time

We assume:

Dealer is paying an outside source for wheel repair of the vehicles at its dealership.

Dealer is waiting for that vendor to show, to remove wheels, to paint wheels, to sometimes send wheels off, to get wheels back.

At this stage, the single greatest frustration to the Dealer is TIME:

WAITING FOR VENDOR TO SHOW

VEHICLES ON LIFT

LOANERS OUT

CUSTOMERS WAITING

OFF-SITE DELAY

It's like waiting in a doctor's waiting room!

You either wait and are frustrated, or maybe you walk out. *With wheel vendors, you cannot even walk out.*
